

Roquette Beauté Unveils a New Microbiome-Friendly Ingredient during in-cosmetics® Global in Paris

Beauté by Roquette® DE 006 is a 100% plant-based soothing ingredient for skin and scalp that also preserves the diversity of skin microbiome.

La Madeleine, France — April 5, 2022 — On the occasion of in-cosmetics® Global, taking place in Paris, France, April 5 to 7, 2022, Roquette Beauté, introduces its new ingredient, Beauté by Roquette® DE 006, INCI Dextrin, to the cosmetics market. With Beauté by Roquette® DE 006, Roquette Beauté meets the rising demand of consumers for natural-based and effective soothing skin and scalp ingredients that preserve the diversity of their skin microbiome.

With an average surface of 2m², our skin microbiota is the widest and probably the **most diverse**. Preserving its harmony and balance is key to protect our skin barrier, to avoid skin issues like inflammation, lack of hydration or sensitive skin.

Every individual has a unique skin microbiota. Numerous external factors can fragilize and influence its balance: temperature variations, UV-exposure, pollution, harsh or synthetic products, or lifestyle.

In recent years, consumers have gained awareness that skin problems can be associated with an imbalanced skin microbiota; as a result, there is a growing demand for efficient plant-based skin care products that are also microbiome-friendly.

Beauté by Roquette® DE 006: a 100% plant-based soothing agent for skin and scalp; microbiome-friendly certified.

Beauté by Roquette® DE 006 is a 100% plant-based dextrin, COSMOS approved, NATRUE approved and vegan suitable; and is the **perfect ally for fragilized and sensitive skin and scalps**.

Different tests were performed to demonstrate Beauté by Roquette® DE 006 benefits:

- It reduces the pro-inflammatory marker (IL-1 alpha).
- It reduces transepidermal water loss (TEWL) induced by chemical and mechanical aggression.
- It significantly reduces redness induced by chemical aggression.
- It helps soothe skin and scalps.
- It preserves the diversity of the skin microflora.

“The addition of Beauté by Roquette® DE 006 to our product range is a great demonstration of our pledge to bring innovative plant-based solutions to the cosmetics industry that meet consumers expectations for safer products with the right balance of nature and technology. For us, Sustainable Beauty is all about Skin Health and Nutrition. We focus on high-quality, versatile and sustainable plant-based ingredients and develop multifunctional solutions providing high performance and an amazing sensorial experience,” says Bénédicte Courel, Roquette Beauté General Manager.

About Roquette: “Offering the Best of Nature”

Roquette is a global leader in plant-based ingredients, a pioneer of plant proteins and a leading provider of pharmaceutical excipients.

The group addresses current and future societal challenges by unlocking the potential of nature to offer the best ingredients for food, nutrition and health markets.

In collaboration with customers who are also passionate about the ongoing food revolution, Roquette contributes to developing a whole new gastronomy that meets consumers' demands.

In the pharma sector, Roquette offers solutions that play a critical role in medical treatments that cure and save lives. Thanks to a constant drive for innovation and a long-term vision, the group is committed to improving the well-being of millions of people all over the world while taking care of resources and territories.

Founded in 1933, Roquette is a family-owned company which operates in more than 100 countries, has a turnover of around 3.5 billion euros, and employs 8,360 people worldwide.
