

## SOLUTAB® – CROSCARMELOSE SODIUM

**SOLUTAB®** is a highly efficient superdisintegrant, widely used in oral solid pharmaceutical formulas and with high efficiency even when used in lower doses.

It is an odorless and white powder, available in different types, such as: **SOLUTAB® A**, **SOLUTAB® A-IP** and **SOLUTAB® EDP**.

**Recommended use:** It is indicated for use in tablets, capsules and pellets, either in formulas manufactured by direct compression, dry and wet granulation, or with intra or extra-granular use.

**Recommended concentration:** 0.5 to 5.0%, it can be increased or decreased according to the formula need.

## SOLUTAB® TYPES

	TYPES		
	A	A-IP	EDP
Average Particle Size (Microns)	60	60	45
Retained on 200 mesh (%)	NMT 10	NMT 10	NMT 2
Retained on 325 mesh (%)	-	-	NMT 10
Loss on drying (%)	NMT 10	NMT 6	NMT 10
