

PRESS RELEASE

Roquette Showcases Scalable Drug Delivery Innovations at CPHI China 2026

Under the theme “One Roquette for Innovations,” the company will highlight its recently expanded portfolio to demonstrate how this unmatched range of high-performance excipients and innovative formulation solutions is powering the next generation of pharmaceuticals.

Shanghai, China, June 10, 2026 – Roquette, a global leader in plant-based ingredients and pharmaceutical excipients, will showcase its comprehensive portfolio of innovative drug delivery solutions at CPHI & P MEC China 2026, taking place June 16-18 at the Shanghai New International Expo Centre (SNIEC). Under the theme “One Roquette for Innovations,” Roquette’s Health & Pharma Solutions Business Unit will exhibit at booth E3D26, highlighting how its deep scientific expertise and technical capabilities enable pharmaceutical companies to turn promising formulations into scalable commercial realities.

“As the pharmaceutical industry accelerates innovation, from GLP-1 therapies to complex biologics, the pressure to deliver manufacturing reliability, consistent supply, and robust formulations at scale has never been greater,” said Angela Strzelecki, Senior Vice President of the Roquette Group and CEO of Roquette’s Health & Pharma Solutions Business Unit. “At Roquette, we are uniquely positioned to address these challenges through our integrated portfolio spanning excipients, formulation technologies, biopharmaceutical solutions, and hard capsules. With a wide manufacturing network and global quality standards, we are committed to being the trusted partner that powers the next generation of drug delivery in China and the Asia Pacific region.”

PEARLITOL® Mannitol: Enabling Scalable, Modern Drug Delivery

Roquette’s PEARLITOL® mannitol, a versatile excipient designed to simplify formulation development while maintaining exceptional performance at scale, will be showcased at the booth. Manufactured in China to support reliable regional supply, PEARLITOL® mannitol enables:

- High and low dose formulations across a wide range of dosage forms
- Enhanced stability in sensitive conditions
- Reliable processability and batch-to-batch consistency
- Flexibility across oral, injectable, inhalation, and biologic applications

Integrated Solutions for Every Stage of Drug Development

Roquette’s booth will feature its complete range of pharmaceutical solutions designed to address the industry’s most pressing challenges:

PRESS RELEASE

- High-performance pharmaceutical excipients: including Avicel® microcrystalline cellulose, Ac-Di-Sol® croscarmellose sodium, METHOCEL™ HPMC, ETHOCEL™ ethylcellulose, and POLYOX™ polyethylene oxide
- Differentiated formulation technologies: across oral solid dosage forms, controlled release systems, and complex specialty formulations
- Biopharmaceutical solutions: including KLEPTOSE® beta-cyclodextrins for protein stabilization and NOVAMATRIX-3D™ alginate foams for 3D cell culture
- Hard capsules and integrated delivery solutions: Qualicaps by Roquette offers a full range of HPMC and gelatin capsules for oral and inhalation applications
- End-to-end support: expertise spanning from early formulation development to commercial manufacturing scale-up

Connect with Roquette at CPHI China 2026

Visit Roquette at booth E3D26 to meet with its team of experts and learn how its integrated solutions can help you overcome formulation complexity and scaling challenges. For more information about Roquette's participation at CPHI China 2026, click [here](#).
